

Web Designer

We've moved to WordPress to develop our website. This free program can be run using just about any browser. Therefore, if you have an internet connection, you can update our website from most locations.

We've got most of it finished. What we need to do each week is insert our audio sermons and bulletins. As many members travel, this is where we need the most help.

If you are computer literate, this might be a service you could provide.

If interested, contact Dwight@DwightKitchens.com or call 863-984-4564.
